About markings

Instructions with  marks in this user manual are essentially important for your safety. Always follow the instructions.

Danger

This marking indicates a high risk of fatal or serious accident if you do not follow the instruction.

Warning

This marking indicates a risk of fatal or serious accident if you do not follow the instruction.

Caution

This marking indicates a risk of injury or breakage of the product if you do not follow the instruction.

※ Do not use the product if it is broken due to the risk of injury.

Prohibition

This marking indicates things you should not do.

Compulsory

This marking indicates instructions which must be followed.

Instructions you should always follow for your own safety

Not respecting the instructions described below may lead to fatal/serious accident or the product breakage.

1. When using

Warning

Do not use the product except as a stepstool.

Prohibition

This product is a “stepstool”, designed to be used as a platform for working at high position. It may induce serious accident by the ladder toppling over or you falling out when misused or used for unintended purpose.

Warning

Compulsory

The stepstool must be used at or below the maximum working load limits.

Do not use the stepstool when total weight of the user and the goods exceed the maximum working load. Keep the size and the weight of goods decent to keep the balance.

Warning

Prohibition

Do not alter or remodel the stepstool.

Altering or remodeling of the ladder may lead to serious accident.

Instructions you should always follow for your own safety

Warning

Prohibition

Do not allow children and others who are incapable of understanding the user manual to use this product.

The user manual describes important matters for safe use. Serious accident may be induced when the stepstool is used by persons incapable of understanding the user manual and/or warning labels.

Warning

Prohibition

Do not place the product in a location near to fire or high temperature.

Heat may cause damage, deformation and dirt.

Caution

Prohibition

Do not use the stepstool when;

- you are tired,
 - you have taken medicine or had alcohol,
 - you are ill or pregnant,
 - you feel physically abnormal
- You may fail to keep your balance.

Caution

Compulsory

Use wearing the appropriate clothing

Do not use the stepstool wearing a long skirt, apron, scarf or clothing that may get caught in the product, or that you are likely to step on while climbing/descending or working.

Caution

Compulsory

Do not wear slippery footwear such as slippers or nylon socks/hosiery.

It increases the risk of slipping and falling.

Caution

Compulsory

When lending the stepstool to someone, lend this user manual as well.

Ensure that they understand what is being instructed in this user manual as it describes matters essential for their safety.

2. Before use

Warning

Compulsory

Always check for any abnormality following the “Prior-to-Use Check (refer to page 11)”.

Never use the stepstool when any abnormality is found. It may lead to serious accident.

Warning

Prohibition

Never use deformed product

The stepstool is made of plastic. The mended product which has once been deformed may readily crack or bend, and may cause serious accident.

3. When carrying

Caution

Prohibition

Do not drag, throw, or handle in any other rough way when carrying the stepstool.

Handling the product roughly will cause deformation, dent and/or damage.

Instructions you should always follow for your own safety

4. Where to install

Warning

Do not install the stepstool in slippery area.

Prohibition

The ladder may topple over, or you may fall out when it is installed on;

- slippery surface such as vinyl floor, tiles, or steel plate,
- wet surface,
- snow-covered or frozen surface,
- surface covered with sand, dust, or fallen leaves, which makes it slippery,
- any other slippery surfaces.

Warning

Do not install the stepstool where it will be unstable.

Prohibition

The stepstool may tilt and may topple over, or you may fall out of the ladder when it is installed;

- on thick carpet or soft ground,
- on unstable or surface uneven,
- where the stepstool does not stand solially,
- on tilted ground, floor or roof,

Warning

Do not install the stepstool in rain or where the strong wind blows.

Prohibition

You may lose balance and fall out of the stepstool, or the stepstool may topple over with slippery step or blown by strong wind.

Warning

Do not install the stepstool in dim light where you cannot see your step or surroundings clearly.

Prohibition

The stepstool may topple over, or you may fall out of the ladder by taking false step or failing to detect dangerous items in your surrounding.

Warning

Do not install the stepstool in door way or in front of a door.

Prohibition

The stepstool may be toppled by the person coming in/going out of the door way or by the door being opened, and you may fall out of the stepstool.

Caution

Do not install the stepstool near dangerous items, or where there is an obstacle overhead.

Prohibition

The stepstool may topple over, or you may fall out of the stepstool.

5. When installing

Warning

Do not try to increase the height of the stepstool by connecting pipes or rods to its rails, or by installing it on a mounting or a box.

Prohibition

The stepstool height may not be modified.

6. When climbing/descending or working on the stepstool

Danger

Do not stand on the edge of, or stand on your toes or on one foot on the top step.

Prohibition

You may lose balance and fall out of the stepstool, may topple over. When standing on position yourself in the center of the plate.

Warning

Do not over-reach from the stepstool.

Prohibition

You may lose your balance by reaching out from the stepstool, and fall out of the stepstool, may topple over.

Instructions you should always follow for your own safety

Warning

Do not move on the top step.

Prohibition

You may lose balance by moving your position on the top step, and fall out of the stepstool, topple over.

Warning

Do not forcibly pull/push items or wall while on the stepstool.

Prohibition

Forcible pulling/pushing generates back action which will make the stepstool unstable, causing the stepstool to topple over, or you to fall out of the stepstool.

Warning

Only allow single person to be on the stepstool.

Prohibition

The stepstool will become unstable and may topple over, or you may fall out of the stepstool.

Warning

Do not carry items which may make you unstable while climbing/descending the stepstool.

Prohibition

You may lose balance and fall out of the stepstool, may topple over. When you are to carry such item, have someone else to hand it to you.

Warning

Do not bridge over two stepstools and use it as a working platform.

Prohibition

Top step may be damaged or the stepstool may become unstable, causing you to fall out of the stepstool, to topple over.

Caution

Take caution when climbing/descending the stepstool, and do not jump on/off from it.

Prohibition

It may lead to injury accident. Take your time and carefully watch your step, when climbing/descending the stepstool.

Prior-to-Use Check

Before using the stepstool, check the following and confirm that no abnormality is detected. If any abnormality is detected, take appropriate measures before using, if it is practicable.

1. Check visually for;

- (1) any grease, oil, mud, snow, paint or any slippery matter on the top step. If any, wipe it off thoroughly (refer to page 12).
- (2) any bend, warp, or dent in the body. If any, never use and discard the stepstool.
- (3) any crack in the each part, If any, never use and discard the stepstool.
- (4) any lost or worn out antislip caps. If any, never use and discard the stepstool. Always contact us for a new antislip cap and replace it.

2. Check with your hands for;

- (1) loose top or legs by twisting them. If any looseness were found, never use and discard the stepstool.

How to use the stepstool

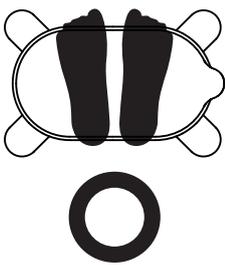

1. Where to install

- Chose a flat and stable area, or where the rails will not sink in.
- Where the ladder will not get wet by rain or water, or catch strong wind.
- Where the ladder will be clear from dangerous items, and allows you to work in balanced posture.
- After installing, check for stability of the ladder and relocate to stable location if any shakiness is found.

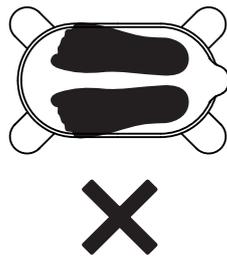

2. How to climb/descend/work on the stepstool

- Be barefoot when inside, or wear sneakers or other non-slip footwear when outside using the stepstool.
- Carefully climb/descend the stepstool facing the ladder.
- Do not reach out from the stepstool when working on the top step.
- When standing on the top step, position yourself in the center of the plate.

Proper position

Wrong position

- When you want to move your position, get off the ladder and then move.

How to care and store after use

1. How to care

Do not place the product in a location near to fire or high temperature.

How to clean

- Wipe off the dirt thoroughly with wet towel.
- When the stepstool is very dirty, wash it with water, and then wipe it dry.
- Wash oily dirt with non-abrasive cleanser or detergent, and wipe it thoroughly so that the non-abrasive cleanser or detergent is completely wiped off.

2. How to store

- Storage space for the stepstool should be dry and well-ventilated.

Caution

- Using the stepstool or storing it for long period on vinyl floor sheet or floor tile may stain the sheet or the tile with the edge of the rails on where the ladder is placed.

When you suspect breakage (Malfunction Check)

■ Unstable when using

Where to Check	What to Do
Check for deformation in top step or legs.	If any, do not use and discard the stepstool.

■ Stepstool is not stable.

Where to Check	What to Do
Check for deformed legs.	If you find deformation, do not use and discard the stepstool.
Check for lost or worn-out antislipcaps.	If any, do not use the stepstool.

Warning

Prohibition

When any abnormality is found, never mend or repair on your own judgment. and may break even if they are mended. It may cause the stepstool to topple over or you to fall out of the stepstool, and may lead to bodily injury.
